

Explanation of Variables in Universities Grade Database

The database includes information only on graduates. Information is not available on candidates who failed to graduate in each year.

Apart from 'YEAR' which denotes the year between 1994 and 2004 to which the row of data refers, each variable includes a University designation as follows:

UCC – University College Cork
UCD – University College Dublin
TCD – University of Dublin (Trinity College)
NUIG – National University of Ireland, Galway
NUIM – National University of Ireland, Maynooth
UL – University of Limerick
DCU – Dublin City University

The University designation is followed in each variable by one of the following codes:

_TOT (total number of graduates)
_Tot21 (total number of graduates minus the number awarded undifferentiated Second Class awards)
_1 (total number awarded First Class Degrees)
1pc (percent of TOT awarded First Class Degrees)
_21 (total number awarded Second Class Grade 1 Degrees)
21pc (percent of Tot21 awarded Second Class Grade 1 Degrees)
_21:1 (ratio of 2.1 to First Class awards)

The following are notes on the compilation of data in Universities where there were irregularities in or uncertainties about grade classifications:

Note 1: UCD figures do not include the Arts faculty because HEA reportage of grades in this faculty was erratic, including classifications of degrees in some years while in other years reporting all Arts graduates as Pass or Ordinary. It is not possible, therefore, to accurately compare UCD figures with those from other Universities. If the Arts faculty had been included the total graduates in each year at UCD would have been as follows:
